Research Interests

Areas: Large Language Models [C2, C4, J1], Score-Based Generative Models [C3, C10, J4, C13], Black-Box Optimization [C1, C12, J5], Retrieval-Augmented Generation [C5, C6, J6], Agents [C10, C14, C15, C16].

My research centers on developing *vision language models / large language models* and *score-based generative models* to advance intelligent systems, with applications in (i) addressing challenges in offline black-box optimization, (ii) enabling knowledge-centric NLP tasks such as automatic knowledge base construction and retrieval augmented generation, and (iii) improving the efficiency and efficacy of agentic systems for real-world applications. My work is supported by multiple fellowships and has been published at top venues including NeurIPS, ICLR, ICML, ACL, EMNLP, and TMLR. Representative contributions include authoring a comprehensive survey on offline black-box optimization with Turing Award Winner Prof. Yoshua Bengio, which is accepted by TMLR with the Survey Certification, and presenting an EMNLP 2024 oral paper (top 3%), and contributing to an ICML 2026 spotlight paper (top 2%). My journey is also complemented by industrial research experiences or close collaborations at Microsoft Research, RBC Borealis, Samsung Research America, and Amazon.

Academic Experience

Jan. 2023 - May. 2027 Expected
McGill University & Mila - Quebec AI Institute, *Montreal, Canada.*
Doctor of Philosophy (Ph.D.), Computer Science.
CGPA: 3.89 / 4.00.
Supervisor: Prof. Steve Liu.
Supervisory Committee: Prof. Adriana Romero-Soriano; Prof. Gintare Karolina Dziugaite.

Oct. 2025 - Jan. 2026
MBZUAI - Mohamed bin Zayed University of Artificial Intelligence, *Abu Dhabi, United Arab Emirates.*
Visiting Scholar, Machine Learning.
Faculty Host: Associate Vice President for Research, Prof. Steve Liu.

Sep. 2019 - Dec. 2022
McGill University & Mila - Quebec AI Institute, *Montreal, Canada.*
Bachelor of Science (B.Sc.), Honours Computer Science.
CGPA: 3.95 / 4.00.
First Class Honours; Dean's Honour List (Top 10%); Recipient of Faculty of Science Scholarship.

Industrial Experience

Jul. 2026 - Oct. 2026
Amazon, *New York City, USA.*
Applied Scientist Intern.

Manager: Dr. Robert A. Barton; Project Mentors: Dr. Prashant Mathur.

- Researched about advanced visual reasoning with VLMs / MLLMs, continual learning, and knowledge distillation to build models that reason about pairs of products and the relationships between them.
- Trained multimodal agentic systems to make decisions over the product graph and invest in efficient LLM inference systems that achieve order-of-magnitude cost reduction while processing millions of daily submissions at billions-of-products scale.
- Formulated the adaptive orchestration policy in multi-agent system as an optimization problem and addressed it with a probabilistic level of efforts estimator and constraints-aware selection rules.

May. 2025 - Oct. 2025 **RBC Borealis**, *Toronto, Canada.*

Research Intern.

Manager: Dr. Eric He; Project Mentors: Dr. Mohammad Amin Shabani; Dr. Siqi Liu.

- Led two concurrent research projects that resulted in two paper submissions within a single internship term. One is accepted by ICLR 2026, and another one is accepted by ACL 2026.
- Proposed an embedding-based context-aware reranking algorithm leveraging structural information and hybrid attention, improving both accuracy and efficiency.
- Developed an LLM-based agentic framework for query-focused table summarization, achieving higher summarization quality while ensuring privacy compliance by avoiding raw data exposure.

Feb. 2023 - May. 2025 **Microsoft Research**, *Cambridge, United Kingdom.*

Student Research Assistant (Remote), MSR-Mila Collaboration.

Manager: Yordan Zaykov; Project Mentors: Dr. Bhaskar Mitra; Dr. Tom Minka.

- Introduced and formalized the structured entity extraction as a new paradigm within information extraction.
- Proposed a new evaluation metric (AESOP) and its variants for structured entity extraction, better aligning evaluation with human judgment.
- Developed a multi-stage decoding strategy that improved extraction effectiveness and efficiency.
- Analyzed the learning dynamics of score-based generative models and LLM-based discriminative models in structured entity linking tasks through a series of controlled experiments.

Jan. 2025 - May. 2025 **Samsung Research America**, *Mountain View, United States.*

Student Research Assistant (Remote), Samsung Global Research Outreach Program.

Manager: Dr. Charlie Zhang.

- Designed entity extraction strategies to automatically construct domain-specific knowledge bases, enabling scalable knowledge graph creation for telecommunications data.

Apr. 2023 - Mar. 2025 **Noah's Ark Lab**, *Montreal, Canada.*

Research Intern.

Manager: Dr. Alex Chen.

- Recognized with multiple awards, including Outstanding Contribution Award (R&D Peripheral Fields), Overseas Business Contribution Award, and President's Spot Award (Canada Research Institute).
- Adapted soft prompting techniques to address distribution shift, enabling a single model to generalize across multiple tasks.
- Explored model compression methods (e.g., LoRA-pruning, Mixture-of-Depth) to reduce computation cost for edge deployment.
- Investigated state-space language models and hybrid architectures with transformers for improved efficiency and scalability.

Publications

During my Ph.D. study, I produced 20+ peer-reviewed publications, 10+ as (co-)first author, across top-tier venues such as NeurIPS, ICLR, ICML, ACL, EMNLP, and TMLR. By October 2026, my work had attracted 1,200+ citations (h-index 10) on Google Scholar, and my open-source contributions were recognized with 200+ stars on GitHub. **Detailed publication links are accessible via the item numbers when available.**

Grants & Fellowships

Total funding: CAD $342,400. Total share of funding: CAD $151,900.

I led or contributed to the work of the following grant and fellowship proposals.

2026 Lambda's Research Grant *(CAD $3,000, share* 100%*)*

Funding Body: Lambda Inc.

2025 Cohere Labs Catalyst Grant *(CAD $1,400, share* 100%*)*
Funding Body: Cohere Lab

2025 Tinker Research Grant *(CAD $7,000, share* 100%*)*
Funding Body: Thinking Machines Lab

2025 DAAD AINeT Fellowship *(CAD $5,000, share* 100%*)* (1 of 18 AINet Fellows in NLP)
Funding Body: DAAD

2024 Samsung Global Research Outreach Program *(CAD $210,000, share* 25%*)* (1 of 11 Recipients Globally)
Lead PI: Prof. Steve Liu
Title: LLM-Driven Efficient and Flexible Network Management for NextG Cellular Communications
Funding Body: Samsung Research

2023 MSR-Mila Collaboration Grant *(CAD $66,000, share* 50%*)*
Lead PI: Prof. Steve Liu; Industrial Mentor: Dr. Bhaskar Mitra
Title: SNAKE: Structured Neural Attention over Knowledge base Entities
Funding Body: Microsoft Research

2023 BMO Responsible AI Fellowship *(CAD $50,000, share* 100%*)*
Funding Body: Bank of Montreal (BMO)

Honors & Awards

Total award amount: CAD $27,000.

2026 ICML Silver Reviewer, *ICML*
2025 Graduate Research Enhancement and Travel Awards (GREAT Travel Award), *McGill University*
2025 Travel Grant, *NeurIPS 2025 Workshop GenAI in Finance*
2025 AINet Fellows in Natural Language Processing, *DAAD*
2025 Graduate Excellence Award, *McGill University*
2025 Student Travel Award, *International Conference on Learning Representations (ICLR)*
2023-2025 Responsible AI Senior Scholar, *Bank of Montreal*
2023-2025 Faculty of Science Graduate Scholarship, *McGill University*
2024 Outstanding Contribution Award in R&D Peripheral Fields, *Noah's Ark Lab Canada*
2024 Overseas Business Contribution Award, *Noah's Ark Lab Canada*
2024 Canada Research Institute President's Spot Award, *Noah's Ark Lab Canada*
2023 Scholar Award, *Neural Information Processing Systems (NeurIPS)*
2022 Graduate Excellence Award, *McGill University*
2022 Graduated as First Class Honours, *McGill University*
2019-2022 Dean's Honour List, *McGill University*
2020-2021 Tomlinson Undergraduate Award, *McGill University*

Media

I actively share and communicate research on social media, with 2,000+ followers across LinkedIn and X.

2026 My first-authored paper QUACK appears on the top 15 daily papers of Hugging Face". Hugging Face Daily Papers.

2025 I represent Mila at its NeurIPS 2025 booth to present my research about "From Surrogates to Diffusion and Language Models: Generative Paradigms for Offline Black-Box Optimization". Mila NeurIPS 2025 Booth.

2024 Oral Presentation of Learning to Extract Structured Entities Using Language Models. EMNLP Recording.

2024 Large Language Model (LLM) for Telecommunications: A Comprehensive Survey on Principles, Key Techniques, and Opportunities. IEEE COMST Post.

2023 Importance-Aware Co-Teaching for Offline Model-Based Optimization. Mila Blog.

Invited Talk, Teaching & Mentorship

- **Invited Talk**
  - *"SPINiverse: Turning Signals inside AI Models into Better, Faster Decisions"*, ACL SIG-FinTech × The Fin AI Webinar. Host: Dr. Zhuohan Xie. September. 2026.
  - *"From Surrogates to Diffusion and Language Models: Generative Paradigms for Offline Black-Box Optimization."*, Mila. Host: Mila NeurIPS 2025 Booth. December. 2025.
  - *"Generative VS. Discriminative Approaches for Entity Linking."*, Microsoft Research. Host: Yordan Zaykov. May. 2025.
  - *"Offline Model-Based Optimization"*, Beijing Academy of Artificial Intelligence. Host: Dr. HongJiang Zhang. Jul. 2024.
  - *"Offline Model-Based Optimization"*, ByteDance AI Lab. Host: Dr. Hang Li. Jun. 2024.
- **Teaching**
  - *"Global AI Leadership Program"*, Teaching Assistant, MBZUAI.
    Worked as the Teaching Assistant for MBZUAI's Global AI Leadership Program equips UAE leaders for the AI era. The program brought together 46 participants from across the UAE's public and private sectors, including senior executives, policymakers, entrepreneurs, and thought leaders.
  - *"COMP 202: Foundations of Programming"*, Teaching Assistant, McGill University.
    Worked as a Teaching Assistant for two semesters at McGill for COMP 202: Foundations of Programming. This course is an introduction to computer programming in a high level language. I worked with Prof. Faten M'hiri for this course.
  - *"COMP 250: Introduction to Computer Science."*, Teaching Assistant, McGill University.
    Worked as a Teaching Assistant for two semesters at McGill for COMP 250: Introduction to Computer Science. This course is about Mathematical tools, Datastructures, Recursive and non-recursive algorithms, Abstract data types and Object oriented programming in Java. I worked with Prof. Giulia Alberini for this course.
- **Mentorship**
  - *"Mila Industry Mentorship Program for Machine Learning Internships"*, Mentor, Mila - Quebec AI Institute.
    Mentored Master students for their internship projects.
    - Work with Qianyun Shen for mentoring her internship at Bauer with Prof. Bang Liu.
    - Work with Ibrahim Nair for mentoring his internship at Watchout with Prof. Bang Liu.
    - Work with Arvind Nair for mentoring his internship at Bell Canada with Prof. Dhanya Sridhar.
    - Work with Paul Kelendji for mentoring his internship at DeepRiver with Prof. Bang Liu.
  - *"Mentor and Collaborate with Junior Students for Research Projects"*
    Under my supervision and guidance, Yonghan co-first authored an ICML paper, Zichen co-authored an ACL paper, and Zhengxi co-first authored an ICLR workshop paper, all during their first year of undergraduate study. I Mentored and collaborated with several undergraduate and junior graduate students:
    - Linfeng Du (McGill University)
    - Zipeng Sun (McGill University)
    - Weixu Zhang (McGill University)
    - Jiaxuan Chen (McGill University)
    - Yuyan Lin (McGill University)
    - Rui Song (McGill University)
    - Weien Li (Massachusetts Institute of Technology)
    - Zeyu Li (National University of Singapore)
    - Haochen Liu (University of Cambridge)
    - Youyuan Zhang (University of Toronto)
    - Zixuan Dong (University of Toronto)
    - Changjiang Han (MBZUAI)
    - Meng Bi (MBZUAI)
    - Zichen Zhao (MBZUAI)
    - Zhengxi Li (MBZUAI)
    - Yonghan Yang (MBZUAI)

"*Overview of FinMMEval 2026 Task 3: Live Financial Decision-Making Agents*". Overview of FinMMEval 2026 Task 3.
  - Mentor and Judge for McGill McHacks Hackathon 9, 10, 11, 12, 13 (2022 - 2026).

Extracurricular Activities

- I am a dedicated **boulderer** in my free time. I find the sport fascinating as it acts as a physical puzzle, perfectly combining strength, body coordination, and strategic problem-solving to master different routes.

- I am an avid **snowboarder** and enjoy exploring different ski resorts during the winter. I am particularly interested in mastering various terrains and constantly improving my technical skills on the slopes.
- One of my biggest hobby is playing **Xiangqi** (Chinese Chess), which is a strategy board game and is the most popular board game in China. The game represents a battle between two armies, with the primary object being to checkmate the enemy's general. It is my fortunate to be mentored by the World Xiangqi Federation international master Bo Peng.
- When I was at junior high and senior high school, I was a member of the school's **basketball varsity**. We won the district's championship once, and the International Schools Basketball Cup Championship once.
- Before studying computer science, I was quite interested in **aerodynamics for plane design**. I received the China National First Tier Project award once, and Beijing Municipal First Tier Project award once.
